

drops schedule

TREATMENT FREQUENCY AND DOSAGE

This treatment **builds** and **establishes** your animal's immune tolerance to the offending allergens:

ANIMAL'S WEIGHT	DOSE
Less than 22 lbs	2 pumps once a day
Greater than 22 lbs	3 pumps once a day

Each bottle contains 300 drops and last 100 or 150 days.

****If your animal's symptoms increase within 48 hours after giving drops, stop and contact your veterinarian before continuing***

Contact your veterinarian
to order a refill.

drops instructions

STEP-BY-STEP GUIDE

PRE-TREATMENT

Withhold food/water 10 minutes before & after treatment to maximize allergen absorption

1

Store the bottles in your refrigerator

2

Prime the pump by depressing several times until the allergen releases consistently

3

Rest the dispensing arm of the pump on your animal's lower lip near the side of their mouth

4

Depress the pump fully and quickly, so the dosage is released between cheek and gum

POST-TREATMENT

- Praise your animal
- Return vial to refrigerator
- Always monitor for 45 minutes as a precaution
